Milk Specialties Global continues to expand throughout the Midwest

Milk Specialties Global is excited to announce a new addition to their family of processing plants. The plant will be a key production facility for specialty whey proteins. Currently, the plant is equipped with drying and evaporating capabilities, and is in the process of installing a proprietary membrane filtration system. The 90,000 square foot facility will employ over 50 people, with commissioning to commence in November of 2010.

"I am very excited about Milk Specialties acquisition of the Fond du Lac plant", states David Lenzmeier, President and Chief Operating Officer of Milk Specialties Global. "Our strategic vision is to be the leader in providing nutritional ingredients, while being the best vendor for our nutritional partners. The acquisition of the Fond du Lac plant is another great investment which demonstrates our commitment to our ongoing customers.

Due to the rising demand of the nutrition industry and overall consumer behavior on health and wellness, The U.S. whey proteins market is anticipated to increase, with steady sales well into the years ahead. The Fond du Lac plant will be a world class production facility, and will act as a significant contributor to the growing whey industry. "Our new facility will allow us to provide continued support and growth to our valued customers, states Lenzmeier. "We work to be a reliable and stable whey vendor, and it's important to watch our customers grow."

Milk Specialties has been steadily expanding manufacturing facilities throughout the Midwest. With the new acquisition, the company has a total of eight operating facilities, located in Minnesota, Wisconsin and Nebraska.

Milk Specialties Global is a manufacturer of nutritional ingredients serving the rapidly growing food and beverage segment of the health and wellness industry. To learn more, visit www.milkspecialtiesglobal.com
