

For starter, grower and finisher pigs, gilts and sows

FAT PAK® 100

Profile

Fat Pak® 100 is a unique product containing 100% pure animal fat. It is a prilled, free flowing beadlet with outstanding handling properties. It is a very palatable source of concentrated energy for stages when pigs have a low appetite for feed. The pure white beadlets are non-dusty with a pleasant caramel aroma. Fat Pak 100 is ideal for inclusion in pelleted diets or mixing into mash or meal feeds.

Fat Pak 100 is manufactured by partial hydrogenation of refined animal fat. The fat is stabilized to ensure maximum shelf life and then prilled to form tiny spherical beadlets.

Guaranteed Analysis

Crude Fat, min	99.0%
Total Fatty Acids, min	94.0%
Unsaponifiable Matter, max	1.50%
Insoluble Impurities, max	0.15%
Free Fatty Acids, max	1.00%
Moisture, max	0.60%

Ingredients

Animal Fat Partially Hydrogenated (Preserved with BHA, BHT, Citric Acid and Propyl Gallate), Artificial Flavor.

Directions for Use

Fat Pak 100 can be top dressed on rations, blended with mixed feed or added to pelleted feed. Recommended inclusion levels for swine formulations are:

- 1-3% in starter diets
- 1-4% in grower and finisher diets
- 3-5% in sow diets

% added fat required in ration	0.5	1.0	2.0	3.0	4.0	5.0
Pounds included/ton of feed	10	20	40	60	80	100

Features

100% Dry animal fat

Prilled, free flowing beadlets provide outstanding handling characteristics

Highly palatable and digestible

Ideal for mixing with mash or meal feeds

Benefits

Starting Pigs Diets (5-20 kg):
Increases palatability and reduces dust

Grower and Finisher Diets (20-100 kg):
Improves average daily gain, improves gain / feed ratio, increases backfat and may improve performance during **heat stress**

When fed a few weeks before slaughter it may change the fatty acid profile enough to increase the hardness of the pork while preventing soft carcasses

Sow Diets (greater than 100 kg):
Reduces nutrient drain on lactating sows, reduces interval of wean to first estrus and can increase milk yield

Easy to use
No liquid spills
No lingering mess

Product is consumed and fully utilized, less waste

Flexible feeding options
