

## Milk Replacers for Dairy and Beef Calves

### Profile

**Calvita®** milk replacers are fortified with optimum levels of Vitamins A, B, C, D and E in addition to all necessary major minerals and key trace minerals.

Calvita is known for its optimally high Vitamin E levels that play a positive role in the immune system of young calves.

### Available Proteins

|                                  |  |
|----------------------------------|--|
| All-milk                         | Best digestibility, best performance                           |
| Milk, Wheat & Plasma             | Excellent digestibility, excellent performance plus antibodies |
| Hydrolyzed Wheat                 | Very good digestibility, better performance                    |
| Soy Protein Concentrate (S.P.C.) | Refined for better digestibility, good performance             |

### Medication Options

#### Deccox (Decoquinat)

For the prevention of coccidiosis in ruminating and nonruminating calves (including veal calves) and cattle caused by *Eimeria bovis* and *Eimeria zuernii*. Feed for at least 28 days during periods of coccidiosis exposure or when experience indicates that coccidiosis is likely to be a hazard.†

#### Bovatec (Lasalocid)

For the control of coccidiosis caused by *Eimeria bovis* and *Eimeria zuernii* in replacement calves. This product contains 45 milligrams of lasalocid per pound. Feed to provide 45 milligrams of lasalocid per 100 pounds (1 mg/2.2 lb) of body weight daily. Feed during periods of coccidiosis exposure or when experience indicates coccidiosis is likely to be a problem.†

#### Oxytetracycline/Neomycin

For treatment of bacterial enteritis caused by *Escherichia coli* and bacterial pneumonia (shipping fever complex) caused by *Pasteurella multocida* susceptible to oxytetracycline; treatment and control of colibacillosis (bacterial enteritis) caused by *Escherichia coli* susceptible to neomycin.†

† Feeding directions will be provided with each item sold.

\* Formula options to ask your sales representative about.

### Features

### Benefits

|   |  |
|---|--|
| High fat level                                  | Provides extra energy for consistent growth  |
| Added vitamins and minerals                     | For optimum growth and complete nutrition  |
| High levels of Vitamin E                        | Plays a positive role in the immune system   |
| Manufactured with exclusive KwikMix® technology | Outstanding mixing convenience   |
| Acidified*                                      | High level - Prevents bacterial spoilage, providing a shelf life of up to 24 hours once reconstituted<br><br>Moderate level - Improves digestibility |

### Calf Management Tips

- Provide a clean, dry, sanitized area for calving
- Separate calf from dam immediately after birth
- Soak (not dip) navel immediately with 7% iodine
- Feed 3-4 quarts high quality colostrum immediately — force feed if necessary
- Place calf in dry, clean, draft-free environment — be sure to shade in the summer
- Keep calf isolated from other animals until weaned
- Feed at least 4 quarts of properly mixed, high quality milk replacer daily
- Provide fresh, free-choice water at all times
- Provide fresh, high quality starter (no hay) ad-lib from 3 days of age. Calves can be weaned once they are consuming > 1 1/2 lb starter daily for 2-3 consecutive days
- Feed 4 quarts daily of milk replacer and 4+ quarts daily of electrolytes to scouring calves
