

## Milk Replacers for Dairy and Beef Calves

### Profile

Calvita® milk replacers are fortified with optimum levels of Vitamins A, B, C, D and E in addition to all necessary major minerals and key trace minerals.

Calvita is known for its optimally high Vitamin E levels that play a positive role in the immune system of young calves.

### Available Proteins

All-milk	Best digestibility, best performance
Hydrolyzed Wheat	Very good digestibility, better performance
Soy Protein Concentrate (S.P.C.)	Refined for better digestibility, good performance
Soy Flour	Good digestibility, good performance

### Medication Options

#### Deccox (Decoquinat)

For the prevention of coccidiosis in ruminating and nonruminating calves (including veal calves) and cattle caused by *Eimeria bovis* and *Eimeria zuernii*. Feed for at least 28 days during periods of coccidiosis exposure or when experience indicates that coccidiosis is likely to be a hazard.†

#### Bovatec (Lasalocid)

For the control of coccidiosis caused by *Eimeria bovis* and *Eimeria zuernii* in replacement calves. This product contains 45 milligrams of lasalocid per pound. Feed to provide 45 milligrams of lasalocid per 100 pounds (1 mg/2.2 lb) of body weight daily. Feed during periods of coccidiosis exposure or when experience indicates coccidiosis is likely to be a problem.†

#### Oxytetracycline/Neomycin

For treatment of bacterial enteritis caused by *Escherichia coli* and bacterial pneumonia (shipping fever complex) caused by *Pasteurella multocida* susceptible to oxytetracycline; treatment and control of colibacillosis (bacterial enteritis) caused by *Escherichia coli* susceptible to neomycin.†

† Feeding directions will be provided with each item sold.

### Features

### Benefits

High fat level	Provides extra energy for consistent growth
Added vitamins and minerals	For optimum growth and complete nutrition
High levels of Vitamin E	Plays a positive role in the immune system
Manufactured with exclusive KwikMix® technology	Outstanding mixing convenience
Acidified*	High level - Prevents bacterial spoilage, providing a shelf life of up to 24 hours once reconstituted  Moderate level - Improves digestability

### Calf Management Tips

- Provide a clean, dry, sanitized area for calving
- Separate calf from dam immediately after birth
- Soak (not dip) navel immediately with 7% iodine
- Feed 3-4 quarts high quality colostrum immediately — force feed if necessary
- Place calf in dry, clean, draft-free environment — be sure to shade in the summer
- Keep calf isolated from other animals until weaned
- Feed at least 4 quarts of properly mixed, high quality milk replacer daily
- Provide fresh, free-choice water at all times
- Provide fresh, high quality starter (no hay) ad libitum from 3 days of age. Calves can be weaned once they are consuming > 1 1/2 lb starter daily for 2-3 consecutive days
- Feed 4 quarts daily of milk replacer and 4+ quarts daily of electrolytes to scouring calves

### Packaging

25 lb bag (with tag)

50 lb bag (with tag)
