

All-Milk Protein For Goat Kids

Profile

NutraStart® Kid Milk Replacer is an instant mixing, all-milk protein, complete first feed for kids. With emulsified fats, supplemental vitamins, minerals and trace elements, it provides the entire nutritional requirements of the baby goat from its second day of life through weaning. Kid milk replacer is acidified to prevent bacterial spoilage, providing a shelf life of up to 24 hours once reconstituted.

Guaranteed Analysis

Crude Protein, min	23.00%
Crude Fat, min	25.00%

Features

Benefits

All Milk Proteins	For maximum growth
Acidified for Use in Cold Ad-Libitum Feeding Systems	An easy to use feeding system Acidification improves kid performance and reduces the incidence of scours
Emulsified Fats and Oils	Optimum fat digestibility
Added Vitamins and Minerals	Provides a complete nutritional diet
Colostrum	Enhances gut health

*Enhanced
with
Colostrum*

Ingredients

Dried Whey Protein Concentrate, Dried Whey, Animal and Vegetable Fat (Preserved with BHA and BHT), Dried Whey Product, Lecithin, Dried Milk, DL-Methionine, L-Lysine Monohydrochloride, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Vitamin B12 Supplement, Folic Acid, Choline Chloride, Riboflavin Supplement, Niacin Supplement, Calcium Pantothenate, Thiamine Mononitrate, [Sodium Propionate, Citric Acid, Potassium Sorbate, Calcium Propionate (Preservatives)], Ferrous Sulfate, Copper Sulfate, Cobalt Sulfate, Zinc Sulfate, Manganese Sulfate, Magnesium Oxide, Ethylenediamine Dihydriodide, Sodium Silico Aluminate, Sodium Selenite, Artificial Flavor

Mixing and Feeding Directions

Mix at the rate of 1½ lb powder per gallon of water or 3 oz (by weight) of powder per pint of water.

DO NOT FEED TO LAMBS - CONTAINS ADDED COPPER

Warm Restricted Feeding: Mix powder in ½ quantity of water at 120° F and then dilute to volume and feed at 98° F. For the first few days, feed a limited quantity (maximum of 1 pint) per feeding up to 3 to 4 times per day. Best results are achieved feeding milk warm (98° F).

Cold Ad-Libitum Feeding: Mix powder in ⅓ quantity of water at 120° F and then dilute to volume and feed at room temperature. This method works well for raising larger groups of kids that have been removed from the mother soon after birth. It is the recommended system when a number of kids are being taken away, as with a milking herd.
