Multi-Species milk replacer

Feeding Directions

Puppies and Kittens: This product is intended for supplemental or intermittent feeding only.

Dogs and Cats: NutraStart® Multi-Species Milk Replacer can be fed as a supplement to current feed. Whenever possible, feed Perki-Lac™ Puppy or Kitten Milk Replacers which have been formulated specifically as complete nutritional milk replacers for puppies and kittens. **Top Dress:** Sprinkle over dog or cat food to increase palatability or to serve as a rewarding treat. Feed at a rate of 1 tbsp per 15 lb of body weight, up to twice per day. **Reconstituted Milk:** Mix 1 oz (by weight) powder into 8 oz room temp water and feed at will, or at 15% of the pet's body weight, in addition to other nutritional food.

Foals and Other Non-Ruminant Hooved Animals: Mix at a rate of 8 oz (by weight) powder to 2 qt water (110° F). Feed daily amounts of powder mixed with water as 6 equal feedings per day for the first 4 weeks, then one less feeding per week until weaned at about 2 months.

Goats and Other Ruminants (Llamas and Alpacas): Mix 8 oz (by weight) powder with 2 qt water (110° F). Feed with a bottle and nipple. Feed goat kids often, giving a small amount at each feeding. Gradually increase the amount fed and reduce feedings per day. Offer dry creep ration as soon as they will eat it.

DO NOT FEED TO LAMBS • CONTAINS ADDED COPPER

Piglets: When piglets must be raised away from the sow, mix 6 oz (by weight) powder to 1 qt water (110° F). Feed 2–4 times per day, giving the pigs only as much as they will clean up promptly. Keep pigs warm and dry and switch them to a dry pre-starter ration as soon as possible.

Calves: With orphaned calves or calves that do not receive sufficient milk from their dams, feed NutraStart® Multi-Species mixed at 8 oz (by weight) powder to 2 qt water (110° F) twice per day.

Finishing Show Calves: Sprinkle NutraStart® Multi-Species over the finishing ration. Start with 8 oz (by weight) of milk replacer morning and night, gradually increasing the amount to be fed up to 2–3 lb per day.
